

Business Continuity Plan

OmniVita Custom Wealth Management (OmniVita) recognizes that our clients rely on our systems and services.

OmniVita has developed a Business Continuity Plan (BCP) that will allow key operation to be re-established should a significant business disruption occur at our Vancouver office.

In the event of an outage, clients should experience minimal downtime in their ability to contact OmniVita. There are pre-established, tested processes for re-routing our critical phone numbers, email and connectivity to our carrying broker National Bank.

The BCP is tested annually.
